SKILLS

Languages: Ruby, JavaScript, HTML/CSS, SQL

Technologies: Rails, React, jQuery, RSpec, Git, A-Frame

PROJECTS

SuperSolVRs

[Live](#) | [Github](#)

Web-based educational virtual reality game designed for elementary-level students

- Integrated the A-Frame framework to create virtual reality environments on a webpage
- Utilized jQuery to give A-Frame objects motion, interaction, and dynamic behavior
- Exercised Agile workflow by having stand-ups, setting flexible goals, and using Trello to organize tasks
- Practiced pair-programming in order to share knowledge and increase productivity
- **Technologies:** A-Frame, Ruby on Rails, jQuery, JavaScript, Heroku, CSS, Trello

MiMoDa

[Github](#)

Web app that allows users to search and display information about a particular movie

- Implemented dynamic single-page functionality by building components with React.js
- Utilized jQuery to asynchronously update React components
- Integrated with OMDb API to aggregate movie information
- **Technologies:** Ruby on Rails, React, jQuery, OMDb API, CSS, Heroku

Portfolio-Helper

[Github](#)

Full-stack web app built using Rails that allows users to construct a mock portfolio and manage stock positions

- Integrated the stock_quote and yahoo-finance gem to provide real-time stock prices and search functionality
- Utilized Postgres database to store user's portfolios and stock positions
- Implemented secure user authentication using BCrypt gem
- **Technologies:** Ruby on Rails, jQuery, Javascript, CSS

EDUCATION

Dev Bootcamp

New York, NY

October 2016 - March 2017

Dev Bootcamp is a full stack web development program that teaches Ruby, Rails, JavaScript, HTML, CSS, and SQL over an 18-week period. This program emphasizes Agile workflow, test-driven development, and pair-programming.

Northeastern University, D'Amore-McKim School of Business

Boston, MA

Bachelor of Science in Business Administration

May 2014
